Ficha Técnica

Product weight without packaging: 12,40 kg

Volume of the assembled product: 0.25 m³

Structure in carbon steel with epoxy paint.

Top is divided into 1 part and can be configured according to customer preference in MDF laminate or stone options.

The top does not follow the structure and does not have specific ordering, having to be chosen by the specific references due to the possibility of configuration.

Base is divided in 1 part always in MDF laminate.

You can not use stone at the base of the product.

The arrangement of the shafts of the wooden blade will always be diagonal.

Recommended product for residential and corporate use.

Shoes on felt.

** Due to product exposure to ultraviolet rays, the wooden

lamina will change in their original color over time.

** Because it is a product that has different configurations,
the weight will vary depending on the composition chosen.
